

## Crawford Forbes

Tucson, AZ | [crawford.forbes@gmail.com](mailto:crawford.forbes@gmail.com) | Portfolio: [crawfordforbes.github.io](https://crawfordforbes.github.io)

### Senior Front-End Developer / JavaScript Engineer

Creative front-end engineer with 10+ years of experience building performant, accessible, and visually rich web applications. Deep expertise in JavaScript and modern web ecosystems, supported by a strong understanding of architecture, data flow, and UI engineering. Passionate about clean, maintainable code, and design systems that scale.

### Professional Experience

#### Simpleview – Tucson, AZ

*Team Lead / Web Developer* | Jul 2018 – Aug 2025

- Led development for 30+ global tourism websites annually; oversaw architecture, scope, and delivery.
- Drove workflow improvements that reduced build times by ~30%.
- Built and customized interactive widgets such as maps, booking tools, sliders, and event systems.
- Integrated REST APIs and optimized data-driven pages for performance and SEO.
- Refactored components for reusability and maintainability in proprietary CMS environments.
- Led builds for award-winning projects including Visit Wyoming, Visit Mackinac Island, and Travel Santa Ana.
- Mentored developers in front-end fundamentals and modern JavaScript workflows.

#### Elegant Thought – Tucson, AZ

*Front-End Developer* | Sep 2015 – Jun 2017

- Developed SPAs for PwC using React, Redux, Webpack, and Highcharts.
- Architected MoneyTree Explorer, a financial data visualization and export tool.
- Created dashboards integrating survey data and analytics APIs via PHP backends.

#### Great Scott Design – Tucson, AZ

*Web Developer* | Aug 2017 – Jul 2018

- Developed WordPress and WooCommerce sites with responsive, secure custom themes.
- Built dynamic PHP features and optimized legacy sites for modern browsers.

### Freelance / Personal Projects

*Front-End Developer* | 2015 – Present

- **sunshinenights.com** – Full-stack JS + Sinatra site featuring a custom CMS and secure authentication.
- **Portfolio Site (2024–Present)** – Greenfield app built with React, TypeScript, and Vite; includes modular UI components and interactive widgets.
